

LAND USE SCENARIOS COMPARISON Population Forecasts

INTRODUCTION

Both the December 2002 and August 2003 Working Copy maps—with population forecasts of 671,300 and 673,700 respectively—contain a population capacity that is about 10,000 persons more than the County’s 2020 target population of 660,700 persons. The population capacity of both Working Copy maps is about 100,000 persons less than the existing general plan. When compared to target populations, all land use scenarios provide higher levels of growth in North County communities, on-target levels of growth in East County communities, and lower levels of growth in Backcountry communities.

Figure E-1: Population Levels over Target Population (660,700)

On a countywide basis, population forecasts for the December 2002 and August 2003 Working Copy maps are closest to the County’s target population. At this point in the planning process, it is important to remain close to that target because of costs associated with infrastructure and provision of essential service, as well as, potential population increases related to the State’s affordable housing requirements.

Table E-1: Population Summary

Community Plan Area	Base Year 2000 ¹	Group Target ²	Existing GP	Working Copy Maps		Board Referrals Scenarios			
				Dec 2002	Aug 2003	Board Referral	Without 80s/160s	Pipeline	Pre- FCI
